

Dear Customer,

In order to help your deployments of IoT Adeunis sensors, we have created a platform to retrieve the activation keys of our products.

Thanks to our platform you will be able to view/export in a few clicks all the keys of your LoRaWAN and/or Sigfox products for all your orders.

You will need to create an account at the first login.

Please note that each order is associated with one (and only one) email address. If several people in your company need access to the activation keys of your Adeunis products, we invite you to create a dedicated key email address.

You will find below a tutorial in order to proceed with the creation of your account.

<https://www.adeunis-kms.com/kms-client>

After clicking on the link above, you will be taken to the next page:

The screenshot shows the Adeunis LMS login interface. At the top, the Adeunis logo and 'WIRELESS PRODUCTS & SOLUTIONS' are displayed. Below this, the title 'ADEUNIS LMS' is centered. The login form consists of two input fields: 'Login' with the email 'salesadmin@adeunis.com' and 'Password' with masked characters. A green 'Login' button with a checkmark icon is positioned below the password field. At the bottom of the form, there are three links: '> First connection', '> Forgot your password ?', and '> Contact us ?'. The entire form is set against a dark blue background with a light blue hexagonal graphic on the right.

During your first connection, you can enter your email address associated with your product order*.

*If you do not know the email address associated with your order, please contact the Sales department (salesadmin@adeunis.com).

WIRELESS PRODUCTS & SOLUTIONS

ADEUNIS KMS

Account management first login

Email / Login

Recovery Email / Login

Mobile phone

Your validated information, a password will be sent to the email address above unchangeable.
The mobile phone number (optional) allows you to activate enhanced security with the sending of an SMS code for each connection.

✓ Validate

You can then enter a recovery email (required) and a phone number.

WARNING, the addition of a phone number (not mandatory) allows the reinforcement of the security of the platform with the sending of an SMS for **each connection**. It is therefore important to fill in a valid phone number accessible by the **main user** if you wish to use this option, otherwise leave the field empty.

You will receive a temporary password to be used during your first connection and to be modified in the "my account" section.

That's it, you access your keys, and you can make different filter/sort by "order number"; "delivery date"; "delivery note number" etc... You will find a tab for LoRaWAN products and a tab for Sigfox products.

And once you have selected the products you are looking for; all you have to do is export them in an Excel format by clicking on the export.xls button.

We plan to officially launch the platform on December 8th, which leaves only four weeks to test and feedback on the platform.

Do not hesitate to contact the Sales department at salesadmin@adeunis.com in case of difficulty or question.

We remain at your disposal and we thank you for your precious help.
